(2015-June) Ladies College Graduation Planned

The elementary school and adult school have already had final exams and the students are in their summer break. The seminary is wrapping up this week. The ladies college will continue through the month of June and conclude the month with their final exams and remission of projects. In July we are planning a special graduation ceremony for 5 of our students. Thank you for your prayers and giving to make a change in the lives of these young ladies.

(2015-September) Multiple Ministries / Multiple Missionaries

God has provided us with a beautiful campus and location suitable for housing several types of ministries and several missionary families to oversee these ministries. On campus we have many ministries functioning together, each overseen by their sponsoring missionary.

The Peart family is working with the elementary school and seminary on campus as well as having other school and church planting ministries in neighboring areas.

The Baker family is working with the seminary and the on campus church, as well as the market ministry, Jesus film ministry, and church planting ministries in Gonaives.

Dr Anne Livingston has a medical clinic on campus which preaches the gospel to each patient they treat. The Bower family is working with the seminary, the ladies college, the adult school, the on campus church, and the radio station on campus as well as having many church planting endeavors in other areas.

We also have a Haitian support staff which help to make all these campus ministries run smoothly. Pray for us as we work hard for God, as He deserves more than we can give.

(2015-October) Motorcycle Purchase

Hector Couloute, who graduated from our seminary in 2007, is pastoring the church we planted in Cadush, Quartier Morin, near Cap Haitian, Haiti. The church is located in a very dangerous area where several friends of ours have been kidnapped. There is a road right by the church, which we used to travel every time we went to Cap Haitian, because it's a good short cut. Recently, a gang of thieves have taken over a part of the road and no one travels through any more. The gang is not more than a mile from the Cadush church. Because of the uncertainty and safety issue, Pastor Hector has been very cautious. But, he has been forced to use public transportation. Through some special gifts, we have been able to purchase a much needed motorcycle for Pastor Hector.

(2015-October) The Radio Ministry Running Strong Again

Because of electrical issues, as well as some staffing problems, the radio ministry shut down from July through September. We have "reopened for business" with an increased staff as well as some more conservative music and preaching to ensure quality gospel music, preaching, and programming 16.5 hours a day. We have been told, there is very little conservative Christian music in the Creole language, but praise God we have been able to find enough to keep the radio fully broadcasting in Creole and French. Pray that the Lord protects the radio equipment in our hot, humid, and non air conditioned climate. Pray for our radio staff as they patiently deal with power outages, heat and humidity in closed recording rooms, and noises from chickens, cows, and passing motorcycles as they record.
